

This document certifies that

**Tanvayee Dhawale**

has successfully achieved the

**CoRise Python for Data Science Certification**

Recipients of the CoRise Python for Data Science certificate have learned the fundamentals of scientific Python through a fast-paced, interactive experience. They have learned how to use core Python DS libraries (Pandas and Numpy) on real Airbnb data, and practiced their skills with hands-on projects.

**Certification criteria:**

- Actively participated in CoRise's dynamic course on Python for Data Science: attended lectures, lab sessions, Fireside Chats with industry leaders, and more.
- Built Python for Data Science projects using Numpy to perform calculation on Airbnb listing data and Pandas to clean and pre-process your data for modeling.
- Developed best practices for ensuring the quality of cleaning and operating data and analysis.
